

Press Release

A TEC provides know-how for cement plant erection in Angola

A TEC supports Nova Cimangola during the construction of a greenfield cement plant “Nova Cimangola 2” project as EPCM (Engineering, Procurement & Construction Management) partner. Since preparing the tender A TEC coordinates all aspects and supervises the erection. Up to five A TEC employees are continuously on site over the entire 30-month construction period. They monitor the establishment technically and ensure that both the schedule and the technical specifications are adhered to. A TEC optimizes the construction process with an eye for detail and an understanding of the whole. In addition A TEC employees lead a supplier quality assurance and ensure a smooth process. The plant, which will have a capacity to produce two million tons of cement per year, will be finished by the beginning of 2017.

A TEC Consulting

In the field of consulting A TEC uses it's technological expertise and market knowledge to get their customers the most efficient plant in the most cost-effective method. As a EPCM partner A TEC takes care of all project activities in close cooperation with customer work groups - from the entire planning to the point of erection.

About the A TEC Group

A TEC Production & Service GmbH is an engineering and technologies company located in Austria. It is focussed on **optimization and efficiency improvement of cement plants**. In total, A TEC has successfully completed more than 450 cement plant optimization projects.

Part of modern cement plant operation is the usage of **alternative fuels**. A TEC can offer the complete AF system for nearly any kind of solid and liquid waste materials including material handling, preparation, storage and feeding into the kiln.

Besides A TEC's core business of cement plant optimization, A TEC provides **consultancy and overall project management and supervision** for Greenfield and Brownfield projects (e.g. *EPCM*), including assistance in tendering process and assistance with environmental and other local norms and standards.

FACTBOX

- A TEC takes over all project activities during greenfield project from Nova Cimangola in Angola
- 30 month construction time
- Scope of Supply:
 - Tender preparation and contract negotiation
 - Technical Services
 - Civil, Mechanical and Electrical erection supervision
 - Supplier Quality Assurance
